Call your local Council or visit [www.rethinkwaste.com.au](http://www.rethinkwaste.com.au) for more details on what can and can't be accepted at your local transfer station.

**The right way to sort your load.**

- ✓ Determine what can be recycled and what is rubbish
- ✓ Keep the same materials grouped together
- ✓ Pack materials in the order that they'll be dropped off
- ✓ Secure your load with a net, ropes and/or straps

When arriving at the Waste Management Centre, your load is checked to see what is being recycled and what is going to landfill. The more recyclables you have, the less you pay. Sort your load to save time, money and reduce waste going to landfill.

**Now there's a good SORT!**

**S****TART** Before you leave home, neatly and securely pack your recyclables and waste. Group the same types of materials together so it's easy to drop them in the different bays.

**O****RGANISE** Pack your trailer or ute to match the order that you'll drop them off. Refer to the map for the order that materials are dropped off as you move around the Waste Centre.

**R****ECYCLE** Separate your recyclables and waste. There are many materials that can now be recycled or dropped off at the Tip Shop. See what else you can recycle to reduce materials going into landfill.

**T****HINK** By sorting your load, you'll save yourself time and money and be doing your bit for Tassie.

**Now there's a good sort!**

For more information on the Burnie Waste Management Centre, call the Council on 03 6430 5700 or visit [www.rethinkwaste.com.au](http://www.rethinkwaste.com.au)

The Goulburn Valley Waste and Resource Recovery Group is gratefully acknowledged for providing the 'Sammy the Trailer' image they developed with a grant from the Victorian State Government.

**Be a Good S\*O\*R\*T**

**Sort your load.**

You'll save yourself time and money and be doing your bit for Tassie.
